

PUMP WATCH™ MULTI

WEB-BASED CELLULAR
REMOTE MONITORING FOR
MULTIPLE APPLICATIONS

PUMP WATCH™

Pump Watch™ is a comprehensive family of cloud based monitoring systems designed for wastewater pump stations, and multiple other applications. The family offers a simple and effective tool for management of wastewater or water collection systems via a cellular network.

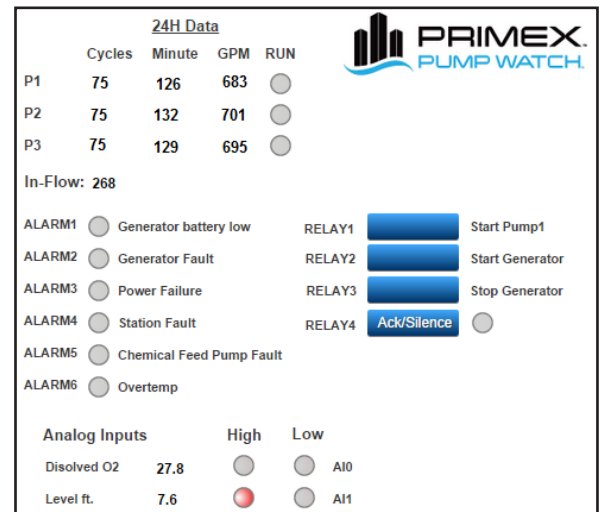

Alarms are monitored and service personnel notified in the event of failure. Data logging and trending of critical information enables users to visually track system performance and recognize impending problems. Station data can be seen in a simple and intuitive format from a web browser on a PC, tablet or smart phone.

PUMP WATCH™ MULTI

Using the same hardware as Pump Watch™ the Pump Watch™ Multi offers user configurable I/OS for applications other than pump station monitoring.

FEATURES

- 6 configurable digital alarm inputs
- 1 configurable analog input (4-20mA)
- 3 configurable relay outputs
- 3 pump run inputs
- Level input (4-20mA)
- I/O descriptions on the web portal are user configurable
